Index to Volume XXII (1985)

The number in parentheses indicates the issue in which the article will be found; the final number indicates the beginning page number.

Asmus, E. P., Jr., & Galloway, J. P. Relationship between music therapy students' contact with and attitude toward disabled persons; *22* (1) 12.

Braswell, C., Decuir, A., & Brooks, D. M. A survey of clinical training in music therapy: Degree of compliance with NAMT guidelines; *22* (2) 73.

Brooks, D. M. See Braswell, C.

Clemens, P. D. See James, M. R.

Cofrancesco, E. M. The effect of music therapy on hand grasp strength and functional task performance in stroke patients; *22* (3) 129.

Decuir, A. See Braswell, C.

Floyd, J. W. See Rider, M. S.

Froehlich, M. A. R. An annotated biblography for the creative arts therapies; *22* (4) 218.

Galloway, H. See Galloway, J. P.

Galloway, J. P. See Asmus, E. P., Jr.

Galloway, J. P., & Galloway, H. Deciduous children: Or, how to say what you *really* mean; *22* (2) 62.

Grant, R. E., & Share, M. Relationship of pitch discrimination skills and vocal ranges of mentally retarded subjects; *22* (2) 99.

Greenfield, D. The evaluation of a computer system for behavioral observation training and research; *22* (2) 95.

Hanser, S. B. Music therapy and stress reduction research; *22* (4) 193.

James, M. R. Sources of articles published in the *Journal of Music Therapy*: The first twenty years, 1964–1983; *22* (2) 87.

James, M. R., Weaver, A. L., Clemens, P. D., & Plaster, G. A. Influence of paired auditory and vestibular stimulation on levels of motor skill development in a mentally retarded population; *22* (1) 22.

Kaufman, F. M., & Sheckart, G. R. The effects of tempo variation and white noise on the general activity level of profoundly retarded adults; *22* (4) 207.

Kirkpatrick, J. See Rider, M. S.

Kovach, A. M. S. Shamanism and guided imagery and music: A comparison; *22* (3) 154.

Myers, K. F. The relationship between degree of disability and vocal range, vocal range midpoint, and pitch-matching ability of mentally retarded and psychiatric clients; 22 (1) 35.

Plaster, G. A. See James, M. R.

Rider, M. S. Entrainment mechanisms are involved in pain reduction, muscle relaxation, and music-mediated imagery; 22 (4) 183.

Rider, M. S., Floyd, J. W., & Kirkpatrick, J. The effect of music, imagery, and relaxation on adrenal corticosteroids and the re-entrainment of circadian rhythms; 22 (1) 46.

Schuster, B. L. The effect of music listening on blood pressure fluctuations in adult hemodialysis patients; 22 (3) 146.

Sheckart, G. R. See Kaufman, F. M.

Standley, J. M. An investigation of the relationship between selected characteristics, educational values, and teaching competencies of freshman music education/therapy majors; 22 (1) 2.

Ten Eyck, S. G. The effect of simulation and observation training on the music teaching behaviors of undergraduate music therapy/music education majors in a field teaching experience; 2 (4) 168.

Thaut, M. H. The use of auditory rhythm and rhythmic speech to aid temporal muscular control in children with gross motor dysfunction; 22 (3) 108.

Weaver, A. L. See James, M. R.
